Executive Summary

May 2026 delivered the most data-rich single month in the thoroughbred bloodstock calendar in recent memory — eleven sales across five countries in twenty-five days, with six providing fully verified statistics. Records fell simultaneously at Fasig-Tipton Midlantic (\$52.7m, all-time record; buyback 17.2%, all-time low), Tattersalls Ireland Breeze-Up (€12.07m, 87% clearance, +31% median to €42k), Goffs Doncaster HIT/PTP (£11m+, +24%), and Tattersalls Ireland May P2P/HIT (record top lot €210k, record seven lots at €100k+). In Australia, Magic Millions delivered a condensed Broodmare Sale (A\$67m, 81%) and a solid Weanling Sale (A\$15.9m, 75%), with Extreme Choice-in-foal mares commanding premiums of A\$2m+. The structural bifurcation that defines global markets has never been more pronounced: documented form and elite pedigree continue to attract record prices; the middle market demands rigorous vendor discipline.

✓ **CONFIRMED:** Extreme Choice-in-foal mares now command the highest per-head premiums in the Australian market. Miss Hellfire (first cover, maiden mare) at A\$2.05m confirms that buyers price sub-fertility scarcity directly into every available covering slot. This dynamic will only intensify as book sizes shrink.

■ **WATCH:** ▼ Aggregate A\$67m vs A\$88m (–24%) primarily reflects smaller catalogue (308 vs 356 sold). Per-head median rose +17% to A\$105k — a clear quality signal. The market is not weakening; it is consolidating around genuine quality. Premium for documented racing form and elite cover remains unlimited.

■ **NOTE:** Legarto (A\$2.8m): five-time G1 winner (NZ) acquired by Arrowfield Stud. Demonstrates that elite racetrack credentials still attract maximum commercial values in the broodmare market regardless of aggregate direction. Context: 'Group 1 winners always make around that money' — consignor Thompson.

✓ CONFIRMED: Dan De Champ: €15,000 foal → €210,000 = 14× ROI. Old Persian (Glenview Stud) is now on the commercial NH radar. This sale rewards documented form from the Irish point-to-point field above everything else. CDL Racing / Emmett Mullins combination is a formidable landing spot.

■ WATCH: Clearance 68% and median –20%: undocumented and unraced lots face significant pressure in this sale. Form is the only credible currency. Vendor discipline on reserves is non-negotiable — particularly in the HIT section where race records can be assessed precisely.

Analyst Conclusion

May 2026 produced the clearest and most complete picture of the global thoroughbred market's structural state in recent memory. The simultaneous records at Fasig-Tipton (\$52.7m, buyback 17.2%), Tattersalls Ireland BU (€12.07m, 87%) and Goffs HIT/PTP (£11m+, 89%) are not coincidence — they reflect a buyer class that is deeply capitalised, highly selective and increasingly international in its deployment of capital. The gap between the top of the market and everything below has never been more pronounced, and the data from eleven sales confirms this is a structural condition, not a cyclical one.

The stallion picture from May 2026 is unusually clear: Sioux Nation / St Mark's Basilica / Starman / Starspangledbanner form the confirmed BU European quartet with verified evidence from multiple sales. Flightline and Extreme Choice dominate their respective hemispheres with no visible competition. Corniche is the first-crop breakout sire of the US 2026 season. Old Persian is the NH emerging commercial signal to monitor. Baaeed and Naval Crown carry the highest repricing potential for the autumn yearling cycle.

■ CRITICAL: LOT 246 (Coulsty × Elhaam): Tattersalls Ireland BU 2026 (€12.07m, 87% clearance, +31% median to €42k) provides a structurally favourable selling environment. Working target 35,000–50,000gns remains well-positioned in the current market. CRITICAL: confirm the reason for the Goffs UK 2025 withdrawal (Lot 159, same cross) before entering the ring. If veterinary: DO NOT BID.
